5 GENERATIONS STRONG AND BUILDING THE FUTURE OF FASTENERS

For more than 75 years, Jay-Cee Sales & Rivet has built its reputation on one simple principle: provide quality fastening solutions backed by exceptional service and industry expertise.

Founded in 1948 in Detroit, Michigan by Jack Clinton, the company has grown from a local fastener supplier into one of the industry's most trusted sources for rivets, rivet nuts, threaded inserts, and specialty fastening products across North America.

Today, **Jay-Cee Sales & Rivet** remains proudly family owned and operated. The company is led by fourth-generation owners Allan and Greg Weitzman alongside Jason and Bryan Clinton, who are continuing the legacy established nearly eight decades ago. In an era where family businesses lasting beyond two or three generations are increasingly rare, **Jay-Cee** has achieved something remarkable, and the future is already taking shape with Allan's son, Jacob Weitzman, joining the company as part of the fifth generation.

That continuity matters. Customers working with **Jay-Cee Sales & Rivet** know they are dealing with people who understand the business not just from textbooks or spreadsheets, but from decades of hands-on

experience passed down through generations. It is a culture that is rooted in relationships, accountability, and long-term commitment.

The company specializes in a full range of fastening products including blind rivets, rivet nuts, threaded inserts, solid rivets, and semi-tubular rivets. Whether they are serving OEMs, automotive manufacturers, industrial suppliers, or fabrication shops, **Jay-Cee** offers fastening solutions designed to meet the demands of modern production environments.

What truly separates **Jay-Cee Sales & Rivet** from competitors is scale combined with responsiveness. With more than 9 million pounds of inventory in stock and over 66,000 SKUs available, the company is positioned to support customers ranging from small operations to large scale manufacturing facilities. Having that depth of inventory means customers can rely on faster fulfillment, dependable availability, and reduced downtime; critical factors in today's supply chain environment.

Equally impressive is the company's sales and support team, which collectively brings more than 200 years of fastener experience to the table. Customers consistently describe the **Jay-Cee** team as attentive, knowledgeable, professional, and quick to respond. In an industry where technical expertise and timing can make all the difference, that level of service has helped the company build long-standing partnerships with customers across multiple industries.

While the fastener industry has evolved dramatically since 1948, **Jay-Cee Sales & Rivet**

has continued to adapt while staying true to its core values. The company embraces modern inventory management, responsive customer service, and evolving product demands, all while maintaining the personal touch that only a family-owned business can provide.

From Detroit roots to nationwide reach, **Jay-Cee Sales & Rivet** represents more than just a supplier, it represents generations of commitment, trust, and expertise. As the company moves into its fifth generation of family leadership, one thing remains clear: **Jay-Cee Sales & Rivet** is still built to last. ♦
